QA Automation Testing Assignment

Using Selenium WebDriver and TestNG, automate the following site:

URL: http://automationpractice.com/index.php

Flow:

1. Create Account under Sign In.

2. Login with new user credentials.

3. On WOMAN section, select any 1 product by clicking on QUICK VIEW and adding 2 Qty for the product to cart.

4. Complete the checkout process by completing the payment flow and in process verifying the total cost of product wherever visible.

5. After completing the payment process, under Profile page, verify the amount of order under ORDER HISTORY.s

Note:

    1. All the steps mentioned in the flow should be automated including Account creation.

    2. There is no restriction in terms of coding but it would be better if you can create you own framework to ease your task.
